

VAILLANT GROUP

VISITOR CENTRE

PROTHERM PRODUCTION

Skalica

Visit our Protherm Production factory in Skalica and follow the stories of the heating technology brands Vaillant, Protherm and Saunier Duval.

## VISITOR CENTRE

Visitor Centre of the factory Protherm Production in Skalica invites all history enthusiasts and fans of modern technologies for a unique tour.

Get to know the factory where more than 500,000 pieces of state of the art equipment for space and water heating are produced every year. Set out on a journey of knowledge with our interactive exhibition, where we explain how boilers are mounted in production lines and how we check their quality. Come and see for yourself that our boilers, produced in Slovakia, are a premium and reliable product serving households all over the world.

Take a look at our modern development centre, where experts bring the already existing boilers of the group Vaillant to perfection.

## OUR PROGRAMME

Stroll through our interactive exhibition and learn about the production of various heating installations in Vaillant Group. Take a close look at the plant where we produce more than 690 different types of heating equipment for the markets in 24 countries of Europe, Asia and Africa.

**Did you know that since the Vaillant Group was founded, it has sold over 40 million household appliances?**

We explain how the inventions of Johann Vaillant, who in 1874 founded this family business in the German town of Remscheid, changed lives in households all around the world. Thanks to his ingenuity, a tubful of hot water was no longer an unattainable luxury.

The tour focuses on Vaillant Group's three most important brands: Vaillant, Protherm and Saunier Duval.

Saunier Duval

## OVER 143 YEARS OF INNOVATION

During the tour, we also map the brands' technical progress. Starting with historical exhibits, demonstrating the oldest ways of heating water in households, we will guide you through the most recent technologies heating with eco heat-pumps and all the way to the new generation of energy-saving condensation boilers.

Our visitors will get to see more than 140 years of Vaillant's history as well as the world of technological innovations aimed at an even higher efficiency, economy, sustainable development and environment protection.

Protherm Production factory in Skalica is part of the German Vaillant Group, producing modern heating equipment for over 25 years.

## VENUE

The tour of our interactive exhibition finishes in a modern lecture room with an auditorium where short films are screened. Its seating capacity is 45 people. The venue can be used for hosting conferences or presentations as well.

## TOURS AND PROGRAMME FOR SCHOOLS

Our Visitor Centre comes with an opportunity for curious pupils and students, who would like to learn more about the manufacturing of boilers in Skalica. Contact us and we will help you organise a personalised tour. We recommend the visit especially for those who are considering studying at a secondary technical school or at universities focused on mechanical engineering, MEP, business or management.

## VISITS FOR THE EXPERTS

The factory in Skalica is Vaillant's important "gate" to eastern markets. The plant's growing significance goes hand in hand with an increased interest in professional visits. Up to 1,400 experts visit the centre on average during one season. Customers and business partners have a chance to not only witness the high quality modern production processes in the Skalica plant, but get a summary of all brands of heating equipment produced here as well.

The tours, accompanied and led by a trained guide, are organised for groups of up to 45 people. The tours of the production branch are organised for groups of up to 15 people.

Provided it's your first visit to the charming city of Skalica and you would like to explore it some more, the manager of our Centre can assist with recommending the best local attractions, restaurants and accommodation. Let us know and plan an attractive, all-day program of your visit.
